# Pattern Transfer

## Instructions

### Light Table/ Window:

Place the pattern on a light table or tape it to a bright window. Position the fabric on top and secure in place. Trace the pattern onto the fabric using a water or air soluble transfer pen.

### Dressmaker's Carbon:

Carbon Paper can be found at many fabric stores. It comes in both light and dark colors. To use, secure your fabric to a flat surface, cover with a piece of carbon paper and place the printed pattern on top. Trace the pattern using a pencil or fine tipped pen. Press firmly for best results. Remove the printed pattern and the carbon paper to reveal the fabric with the transferred pattern.

### Iron On Transfer Pencil or Pen:

This method uses an iron on transfer pen or pencil which can be found at most fabric/sewing stores. First, print the REVERSE IMAGE pattern. Trace the pattern with the iron on pencil or pen. Place the pattern, traced side down, on top of your fabric. Press a hot iron on top of the fabric for 5-10 seconds. Do not move the iron around. Gently lift an edge of the fabric to check that the design has transferred before removing the fabric.

\* This method will leave permanent marks that need to be covered with embroidery or they will show on the finished piece.

## Materials List

- Fabric Square in appropriate size for your pattern & hoop size choice:  
Choose a fabric with a loose to medium weave such as a cotton, muslin, or flour sack. The above example uses a white muslin, but don't be afraid to try a darker color combines with white or silver floss.
- Embroidery Hoop:  
Choose a suitable size for your pattern
- Embroidery Needle:  
Size 7 or 9
- Water Soluble Pen or other items for pattern transfer.  
(See Transfer Instructions)
- Small Scissors
- DMC Embroidery Floss:  
The example uses #775 & #331. Feel free to use any floss colors you like!
