Pattern Transfer

Instructions

Light Table/ Window:

Place the pattern on a light table or tape it to a bright window. Position the pattern on top and secure in place. Trace the pattern onto the fabric using a water or air soluble transfer pen.

Dressmaker's Carbon:

Carbon Paper can be found at many fabric stores. It comes in both light and dark colors. To use, secure your fabric to a flat surface, cover with a piece of carbon paper and place the printed pattern on top. Trace the pattern using a pencil or fine tipped pen. Press firmly for best results. Remove the printed pattern and the carbon paper to reveal the fabric with the transferred pattern.

Iron On Transfer Pencil or Pen:

This method uses an iron on transfer pen or pencil which can be found at most fabric/sewing stores. First, print the REVERSE IMAGE pattern. Trace the pattern with the iron on pencil or pen. Place the pattern, traced side down, on top of your fabric. Press a hot iron on top of the fabric for 5-10 seconds. Do not move the iron around. Gently lift an edge of the fabric to check that the design has transferred before removing the fabric.

* This method will leave permanent marks that need to be covered with embroidery or they will show on the finished piece.

Material List

- Fabric cut to 12.5" x 12.5" square

(This size is for the hoop or the pillow. You will need 2 squares for the pillow)

Choose a fabric with a loose to medium weave such as cotton, muslin, or flour sack. The above example uses a white muslin, but don't be afraid to try a darker color.
